

## Zeston® PVC

### Installation Accessories

#### Description

Zeston installation accessories offer outstanding compatibility and performance in the systems for which they are designed. When used in conjunction with the various Zeston products, they complete a systems package which features ease of installation, uniform appearance, and optimum, long-term insulation and protection.

A complete Zeston system, using components and accessories which are fully integrated, will give you an easy-to-install, professional job which offers peak performance in a neat, uniform installation.

#### Perma-Weld® solvent welding system adhesive

Perma-Weld solvent welding system adhesive is applied with a standard applicator gun and forms a permanent chemical bond between the PVC members. It takes an initial set in 10 minutes with complete adhesive curing in 8 to 10 hours. Perma-Weld adhesive can be used on 20 and 30 mil (0.5 and 0.8 mm) jacketing and most Zeston 2000/300 PVC insulated fitting covers where a totally sealed system is required, such as in the USDA market. Perma-Weld adhesive is available in one quart (0.95 liter) and one gallon (3.78 liter) containers.

**Note:** It is recommended that Perma-Weld adhesive be applied at temperatures above 40°F (4°C).

#### Perma-Weld adhesive applicator

Pump-type gun for application of Perma-Weld adhesive. Holds 6 ounces (177 ml).

#### Perma-Weld® Thinner

Perma-Weld Thinner is used primarily for clean-up or removal of Perma-Weld Adhesive from applicator guns and equipment. Available in single gallon (3.8 liter) containers or packed six quarts (0.95 liters/container) per case, it should be used sparingly to thin adhesive if necessary.

#### PVC Z-Tape

Z-Tape was developed to provide excellent adhesion, even when applied during cold or humid weather. It is flexible polyvinyl chloride film, coated with a specially formulated adhesive. Z-Tape is available in thicknesses of 5 mils (0.13 mm) and 10 mils (0.25 mm) and can be applied indoors and outdoors\* at temperatures as low as 40°F (4°C) to achieve a strong, permanent bond. It has an effective installed temperature range of 0°F to +150°F (-18°C to +66°C).

Z-Tape has excellent resistance to chemicals, acids, alkali, oils, greases, bacteria, and fungus. It can bridge gaps and cover almost any contour or shape for a complete seal.

\* Z-Tape II is recommended for indoor use only.

#### Specification Data

Property	Z-Tape II*	Z-Tape*
Gauge, mils (mm)	5 ± 0.5 (0.13 ± 0.013)	10 ± 1 (0.25 ± 0.025)
Available color	White	White
Upper temperature limit	+150°F (+66°C), constant	+150°F (+66°C), constant
Lower temperature limit	0°F (-18°C), constant	0°F (-18°C), constant
Surface Burning Characteristics per ASTM E 84	Flame spread: 5 Smoke developed: 0	Flame spread: 10 Smoke developed: 0
Adhesion to backing, oz./in. (kg/mm)	14 (0.02)	30 (0.033)
Tensile strength lbs./in. width (kN/m)	15 (2.6)	27 (4.7)
Elongation (%)	150	200
Finish	Smooth	Smooth
Dimensions	Available in 1", 1½" and 2" (25 mm, 38 mm and 51 mm) widths Standard lengths: 108' (33 m)	Available in 1", 1½" and 2" (25 mm, 38 mm and 51 mm) widths Standard lengths: 100' (31 m)
Conforms to MIL-I-7798-C standard packaging	1" (25 mm) size 12 per ctn. 1½" (38 mm) size 8 per ctn. 2" (51 mm) size 6 per ctn.	1" (25 mm) size 12 per ctn. 1½" (38 mm) size 8 per ctn. 2" (51 mm) size 6 per ctn.

\* Tests are conducted in accordance with ASTM D 1000. Values indicated are typical.

#### White, stainless steel thumb tacks

Annular serrated stainless steel thumb tacks, 500 to a box, help speed the installation of Zeston PVC insulated fitting covers on hot work where a vapor retarder is not required.
